"We continued to build momentum with accelerated results in the third quarter, as we generated revenue and earnings per share well above expectations," said Ritch Wood, chief executive officer. "As we executed on our long-term strategy, we drove double-digit growth in both customers and sales leaders with revenue improvements in all but one reporting segment. We delivered strong double-digit growth in the Americas, Pacific and EMEA regions, with modest growth throughout most of Asia. Mainland China continues to stabilize with sequentially improving revenue, customers and sales leaders, and we remain on track for a return to year-over-year growth in China in the fourth quarter. Our manufacturing division contributed to our results with impressive 34 percent growth.

"We are outpacing our 2020 growth projections due to strong product demand and ongoing digital investments that empower our sales leaders and affiliates to build a socially enabled business. We are also benefitting from the current environment where more individuals are working from home and shopping online. Currently, approximately 90 percent of Nu Skin revenue is coming from digital transactions."

"The growth in our core Nu Skin business is generating a great deal of energy ahead of our fourth-quarter ageLOC Boost and Nutricentials product introductions, and we continue to see increasing demand in our manufacturing segment. This gives us confidence that we will have a strong fourth quarter with momentum heading into 2021 when we fully launch these products and continue to extend our socially enabled business throughout our markets," Wood concluded.

Mark Lawrence, chief financial officer, added, "Given our third-quarter results above previous guidance and momentum in the business, we are raising our guidance for the remainder of the year. As we look ahead to the fourth quarter, we anticipate revenue of \$720 to \$750 million, which includes an approximate 1 percent favorable foreign currency impact, and earnings per share of \$1.10 to \$1.20. **Non-GAAP Financial Measures:** Constant-currency revenue change is a non-GAAP financial measure that removes the impact of fluctuations in foreign-currency exchange rates, thereby facilitating period-to-period comparisons of the company's performance. It is calculated by translating the current period's revenue at the same average exchange rates in effect during the applicable prior-year period and then comparing that amount to the prior-year period's revenue. The company believes that constant-currency revenue change is useful to investors, lenders and analysts because such information enables them to gauge the impact of foreign-currency fluctuations on the company's revenue from period to period.
